

## Personal, Social and Emotional

We will be continuing to develop our independence and confidence as we prepare for the transition to year one. We will be learning about relationships and changes during our daily circle times. This will also help us with the transition to year one.

## Literacy

We are going to continue with our daily phonics sessions, consolidating all the sounds and words we have learnt so far and applying them to both our reading and writing. We are going to start reading as part of a group instead of individually and have a go at story sequencing which will lead to us creating our own stories.

## Understanding of the World

We will be continuing with our 'Walking Wednesdays' in which we explore our local environment and talk about the changes in seasons. We will be looking at plants and what they need to grow. We will continually use the computers to support our learning.

## Communication and Language

We will be consolidating our listening and attention skills ensuring that we can concentrate on an activity for at least 10 minutes. We will be following instructions involving at least two parts and beginning to develop our own stories and tell them to the class.

## Reception

### Summer Term

## Music

We will be exploring the concept of pitch (high and low) and learning to recognise 3 different pitches, rhythm, working on maintaining 2 beats at a time in groups and keeping an ostinato going. We will be discussing our feelings in music.

## Forest School

## Physical Development

We will continue to take part in our daily LEAP into Life sessions to develop our gross motor skills and spatial awareness. We will also be having one longer PE Session per week where we will be learning to play some team games. We are going to start getting changed for PE which will help us practice getting ourselves dressed.

## Numeracy

In Numeracy this term we are going to bring together all the basic number knowledge we have covered this year. This will involve us solving simple number problems including doubling and halving, solving simple single digit number sentences and sorting shapes by their features. We will also be learning about capacity, position and time.

## Expressive Art and Design

We will be continuing to explore colour, texture and sound and using this to express ourselves. We will be developing our imaginative skills to help us with story writing and to role play our ideas alongside our friends.
